

BUFLEX / TOLEX

9710002 KIT

Buflex (a unique wet sanding system) and Tolex (a dry sanding system) integrates an ultra-flexible **latex abrasive** sheet and a specially formulated pad that cuts fast with a **shallow scratch pattern** which is **easier to polish** than 3000 grit or finer. In addition, because of Buflex's flexibility, it can even polish inside the valleys of orange peel without eliminating its texture, making **matching OEM** finishes a breeze. Its easy to see how this system is effective even on the most uneven surfaces.
