

MASTICE 35/41

2K polyester bonder. Specialty product for the boat building sector.

Very low specific weight, filled with ultralight microspheres.

Designed for assembling foamed and balsa panels in the nautical sector. In general, it can be used in all those cases in which a low specific weight is required.

It has exceptional adhesion and knife applicability properties.

The color changes with curing.

CHARACTERISTICS:

- Base: polyester unsaturated resin
- Specific gravity: $0,67 \text{ g/cm}^3 \pm 0,05$
- Colour: light blue (becomes white after curing)
- Fair non-sag consistency
- Fair ease of sanding.

APPLICATION:

Can be easily applied by knife.

Do not apply at temperatures below 5°C.

The final mechanical characteristics vary according to the working temperature.

PREPARATION OF THE MIXTURE:

Catalyze at 1.5/2.5% according to the temperature (2% between 10 and 20°C). Use liquid hardener.

POT-LIFE:

At 20°C: 37 ± 7 minutes

The effectiveness of our products is based on practical experiences and research work carried out in our laboratories; nevertheless we accept no liability for work carried out following our instructions being clear that the final result depends in all cases on a series of unforeseeable factors.
